BUREAU OF STATISTICS

SURVEY OF EMPLOYMENT, PAYROLLS & HOURS

November 2006

1 Yukon Employees (based on employer payroll counts)

- The number of employees* in Nov., 2006 16,896
- The number of employees* in Nov., 2005 16,388
- The difference was an increase of 508
- As a percentage, the increase was 3.1%

* Does not include self-employed workers

In November of 2006, the preliminary number of employees* in the Yukon totalled 16,896. There were 2,107 in Goods-producing Industries, an increase of 560 employees, or 36.2%, over the November 2005 figure of 1,547. In November of this year, there were 14,578 in Service-producing Industries, a decrease of 95 employees, or 0.6%, from the November 2005 figure of 14,673.

2 About the Survey of Employment, Payrolls and Hours

There are two perspectives on Yukon employment. One, based on the Labour Force Survey (LFS), provides the perspective from a sample of households reporting experience of employment and unemployment. The other, based on the Survey of Employment, Payrolls and Hours (SEPH), provides a perspective on the number of employees based on employer administrative payroll records. The LFS is generally well known and is the focus of a regular series of monthly publications by the Yukon Bureau of Statistics. SEPH is less well-known but has the advantage of being a monthly census of all in-scope businesses maintained by the Business Register Division of Statistics Canada and from a list of all businesses registered in Canada Customs and Revenue Agency's Business Number program with one or more active payroll deduction accounts. Public Institutions Division of Statistics Canada provides information for general government services at the territorial level. *However, those enterprises primarily involved in agriculture, fishing and trapping, private household services, religious organizations and military personnel of defense services are excluded.*[1] It should also be noted that **SEPH does NOT include self-employed workers** in any of its figures. In November 2006, the Labour Force Survey estimated 2,900 self-employed Yukoners.

Comparisons between the LFS estimates of employment and the SEPH report of the number of employees will reveal differences which are largely due to the exclusion of self-employed workers and employees having more than one job at a time. For example, it is entirely possible to have SEPH report 17,000 paid employees in a month which could be filled by 8,500 workers each working two jobs; or 15,000 working one job and 500 working two jobs and 333 working three jobs. Historically, the number of multiple job holders reported by the LFS has varied between 700 and 1,400 with an average of just over 1,000 from 1992 through 2005. What we do not know from the LFS is how many jobs multiple job holders held in a given month.

The most current month's figures released are always preliminary and are revised the following month. Caution should be used when using the most current month's figures as the revisions are sometimes significant.

Source: Statistics Canada CANSIM Table 281-0023

- There were 16,896 employees in the Yukon in November of this year. The average number of employees in the Yukon for November 1991-2005 was 13,747; the November '06 total of 16,896 is an increase of 3,149, or 22.9% over the November average; it is also the highest number of total employees for November since the survey began in 1991.
- The seasonal cycle in the Goods-producing sector sees more employees during the June through October time period than during the November through May months. The number of employees peaks in the July/August months, and 2006 numbers are consistent with historical fluctuations observed in this sector.

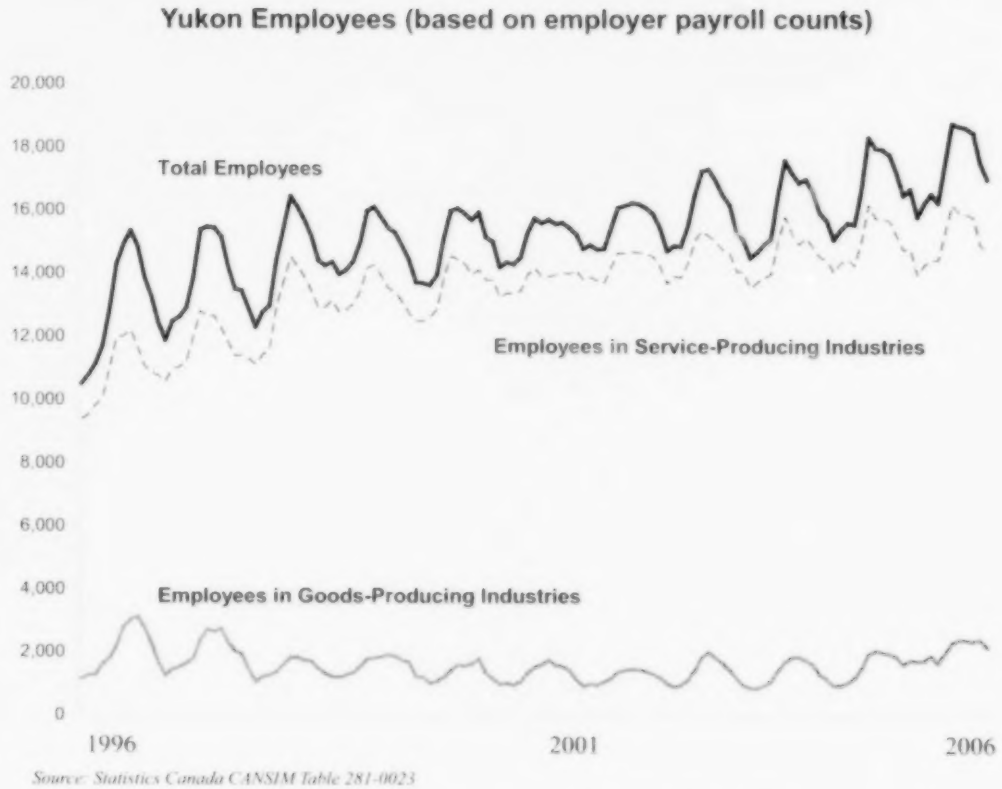
Average Nov 1991 to 2006		**296**	**177**	**1,356**	**834**	**1,206**	**4,044**

* *Public adminstration includes all levels of government (federal, territorial, municipal and First Nations). Public Administration does not include teachers, college instructors etc. or health care workers who are captured in the Educational Services and Health and Social Service industries respectively.*

Source: Statistics Canada CANSIM Table 281-0023 *(p) = preliminary (r) = revised*

- The Service-producing sector is also influenced by seasonal fluctuations; there are more employees in the summer months, as would be expected with increased tourism traffic.
- From 1991 to 2005, on average for the month of November, the Public Adminstration sector has accounted for 28.9% of all Yukon employees. In November 2006, the number of employees in Public Administration (5,201) was consistent with this historical trend, accounting for 30.8% of all Yukon employees.

5 Yukon Employees, January 1996 to November 2006



Source: Statistics Canada CANSIM Table 281-0023

- The above graph highlights the cyclical nature of employment in the Yukon, with increased employees through the summer months and a decrease through the winter.
- The graph also highlights that gains in the number of employees over the last 10 years have mainly been in the Service-producing Industries.
- Notable as well is the anomaly of the number of Goods-producing sector employees in the first six months of 2006. The number of employees in this sector has held relatively steady throughout the winter months of 2005/2006 without experiencing the winter contraction historically experienced in this sector. This year, the Goods-producing sector experienced typical summer growth.

Note: In addition to the industries listed, 'Total Number of Employees' includes unclassified industries as well as industries with suppressed individual numbers. Under Goods-Producing Industries, this includes: Forestry, Logging and Support; Mining and Oil and Gas Extraction; Utilities; and Manufacturing. Under Service-Producing Industries, this includes: Real Estate and Rental and Leasing; Professional, Scientific and Technical Services; Management of Companies and Enterprises; Arts, Entertainment and Recreation; and Other Services (except Public Administration).
